COLORADO WOMEN’S COLLEGE IT DEGREE & UNIVERSITY COLLEGE MASTERS IN INFORMATION TECHNOLOGY

The BA in Information Technology (IT) at Colorado Women’s College is an interdisciplinary program that prepares students to recognize IT opportunities, define solutions and apply them to real-world problems.

The MAS in Information and Communications Technology from University College allows students to specialize in areas of information technology such as networking, project management, databases, software design, technology management, telecommunication, web design, GIS, and security.

IT students interested in pursuing a graduate degree may take up to two University College graduate classes (8 credit hours) that will count as IT electives. These graduate classes will also count toward the graduate degree.

Students from Colorado Women’s College must apply for provisional acceptance into University College prior to taking classes. Students can apply if they:

- Are declared IT majors
- Have achieved junior level status with a GPA of at least 3.0
- Obtain a recommendation from the Program Chair of IT Studies

Students can take University College classes when they have reached senior status at Colorado Women’s College.

ELIGIBLE UNIVERSITY COLLEGE CLASSES
Students may take two of the University College graduate courses listed below:

ICT 4000 ICT Industry Structures and Concepts
ICT 4005 ICT Current Technologies and Trends
ICT 4015 Managing Technology for Strategic Value
ICT 4300 Web Enabled Information Systems
ICT 4305 Object Oriented Methods
ICT 4310 Distributed Client Server
ICT 4800 Telecom Networks
